

Alfresco Enterprise Edition 4.1.4 Release

April 24th, 2013

The following notes provide detailed information on the Alfresco Enterprise Edition 4.1.4 release.

Installation

Please refer to Installing Alfresco for more details.

If upgrading from a previous release:

- Please back up your database and content store (alf_data directory) prior to installation.
- Please note that it's important to install the same combination of Alfresco-supplied modules (AMPs) as you had previously. To do so using the Installation Wizard, choose "Advanced" mode.
- Note that some installation instructions may have changed since the previous service pack so carefully re-read the instructions for your application server.

Known Issues

SEVERITY	KEY	SUMMARY	COMPONENT
Blocker	MNT-1946	No buffer space available error on multiprocessor Windows servers If you see the error "java.net.SocketException: No buffer space available (maximum connections reached?): JVM_Bind" when running Alfresco on a Windows platform, you may be experiencing the problem described at this link, for which a hotfix is available: http://support.microsoft.com/kb/2577795	Installation, Search
